How accessible this website is

We completed a website accessibility review in October 2024 by Juniper (external company). The following actions were needed:

Page	Category	Issue
Site wide	Text contrast	To comply with WCAG AA, the colour of text must sufficiently contrast with its background colour, so that people with moderate visual impairments can read it. The contrast ratio must be at least 4.5:1 for body text, and 3:1 for large text. #FFFFFF white on #E1306C pink fails at 4.34:1 #FFFFFF white on #B7C23A green fails at 1.95:1 #FFFFFF white on #AE96BB purple fails at 2.67:1 #B7C23A green on #604071 purple fails at 4.37:1 Please could you confirm if you are happy for us to select the closest accessible colour. Alternatively, please provide the hex code that you would like us to use and I can arrange for this to be changed for you. You can use this website to check the contrast.
